| 1.  | SU2.3      | Communicate and counsel patients and families about the treatment and prognosis of shock demonstrating empathy and care | DOAP       | Dr. H.B. Janugade<br>9822394808<br>Dr. Yashwanth Roy<br>9652448732 |

| 2.  | SU3.2  | Observe blood transfusions.                                                                                                   | DOAP            | Dr. H.B. Janugade<br>Dr. Yashwanth Roy                              |
|-----|--------|-------------------------------------------------------------------------------------------------------------------------------|-----------------|---------------------------------------------------------------------|
| 3.  | SU3.3  | Counsel patients and family/ friends for blood transfusion and blood donation.                                                | DOAP            | Dr. H.B. Janugade<br>Dr. Yashwanth Roy.                             |
| 4.  | SU 4.4 | <b>Burns-</b> Communicate and counsel patients and families on the outcome and rehabilitation demonstrating empathy and care. | Bed Side Clinic | Dr. A.Y.Kshirsagar<br>Dr. SudireddyParth<br>8074481220              |
| 5.  | SU 5.2 | Wound healing and wound care- Elicit, document and present a history in a patient presenting with wounds.                     | Bed Side Clinic | Dr. Nitin Nangare<br>9225803343<br>Dr. Adwita Narayan<br>9142008946 |
| 6.  | SU 5.3 | <b>Wound healing and wound care-</b> Differentiate the various types of wounds, plan and observe management of wounds.        | Bed Side Clinic | Dr. Nitin Nangare<br>Dr. Adwita Narayan                             |
| 7.  | SU8.2  | Demonstrate Professionalism and empathy to the patient undergoing General Surgery                                             | DOAP            | Dr. Nitin Nangare<br>Dr. Adwita Narayan                             |
| 8.  | SU9.3  | Communicate the results of surgical investigations and counsel the patient appropriately                                      | DOAP            | Dr. Nitin Nangare<br>Dr. Adwita Narayan                             |
| 9.  | SU10.1 | Describe the principles of perioperative management of common surgical procedures                                             |                 | Dr. R.G.Naniwadekar<br>Dr. Esha<br>8408041271                       |
| 10. | SU10.2 | Describe the steps and obtain informed consent in a simulated environment                                                     | DOAP            | Dr. R.G.Naniwadekar<br>Dr. Esha                                     |
| 11. | SU10.3 | Observe common surgical procedures and assist in minor surgical procedures; Observe emergency lifesaving surgical procedures. | DOAP            | Dr. R.G.Naniwadekar<br>Dr. Esha                                     |
| 12. | SU10.4 | Perform basic surgical Skills such as First aid including suturing and minor surgical procedures in simulated environment     | DOAP            | Dr. V.V.Kanase<br>9822054044<br>Dr. Advait<br>9604947605            |

| 13. | SU11.3   | Demonstrate maintenance of an airway in a mannequin or equivalent                                                                               | DOAP            | Dr. V.V.Kanase<br>Dr. Advait                                       |
|-----|----------|-------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|--------------------------------------------------------------------|
| 14. | SU13.4   | Counsel patients and relatives on organ donation in a simulated environment                                                                     | DOAP            | Dr. V.V.Kanase<br>Dr. Advait                                       |
| 15. | SU 14.1  | Basic Surgical Skills - Describe Aseptic techniques, sterilization and disinfection.                                                            | Bed Side Clinic | Dr. V.V.Kanase<br>Dr. Advait                                       |
| 16. | SU 14.2  | <b>Basic Surgical Skills -</b> Describe Surgical approaches, incisions and the use of appropriate instruments in Surgery in general.            | Bed Side Clinic | Dr. H.V.Nerlekar<br>9922495092<br>Dr. Satyajeet<br>9130254413      |
| 17. | SU 14.3  | Basic Surgical Skills - Describe the materials and methods used for surgical wound closure and anastomosis (sutures, knots and needles          | Bed Side Clinic | Dr. Akash Katkar<br>7090638084<br>Dr. Salunkhe Paras<br>8087879769 |
| 18. | SU 14.4  | Basic Surgical Skills - Demonstrate the techniques of asepsis and suturing in a simulated environment                                           | DOAP            | Dr. Akash Katkar<br>Dr. Salunkhe Paras                             |
| 19. | SU 17.5  | <b>Trauma</b> - Describe clinical features for neurological assessment and GCS in head injuries                                                 | Bed Side Clinic | Dr. Akash Katkar<br>Dr. Saurabh Gondil                             |
| 20. | SU 17.6  | <b>Trauma</b> - Describe clinical features for neurological assessment and GCS in head injuries                                                 | Bed Side Clinic | Dr. Akash Katkar<br>Dr. Saurabh Gondil                             |
| 21. | SU 17.8  | <b>Trauma -</b> Describe the pathophysiology of chest injuries.                                                                                 |                 | Dr. Akash Katkar<br>Dr. Saurabh Gondil                             |
| 22. | SU 17.10 | <b>Trauma - D</b> emonstrate Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment | DOAP            | Dr. Akash Katkar<br>7090638084<br>Dr. SagarPaliwal<br>8860055935   |

| 23. | SU18.3 | <b>Skin and subcutaneous tissue -</b> The clinical examination of surgical patient including swelling and order relevant investigation for diagnosis. Describe and discuss appropriate treatment plan. | Bed Side Clinic | Dr. Akash Katkar<br>Dr. SagarPaliwal<br>8860055935                   |
|-----|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------------------------------------------------|
| 24. | SU22.3 | Endocrine General Surgery: Thyroid and parathyroid -Demonstrate and document the correct clinical examination of thyroid swellings and discus the differential diagnosis and their management          | Bed Side Clinic | Dr. H.V.Nerlekar<br>9922495092<br>Dr. Nevil<br>9375063845            |
| 25. | SU22.4 | Describe the clinical features, classification and principles of management of thyroid cancer                                                                                                          | DOAP            | Dr. MayurNagavekar<br>9422054859<br>Dr. Patel Nishith<br>8238055033/ |

# KRISHNA INSTITUTE OF MEDICAL SCIENCS, KARAD DEPARTMENT OF PEDIATRICS PHASE II CLINICAL POSTING

| Sr No | Competency<br>Number | Topic                           |
|-------|----------------------|---------------------------------|
| 1     |                      | Introduction to Pediatrics      |
| 2     |                      | Chief complaints & ODP          |
| 3     |                      | Past history and Family history |

| 4 |          | Birth History and Immunization history                                       |
|---|----------|------------------------------------------------------------------------------|
|   | PE 19.1  | Explain the components of the Universal Immunization                         |
|   |          |                                                                              |
|   | PE 19.3  | Program (UIP) and the National Immunization Program (NIP)                    |
|   |          | Vaccine description with regard to classification of vaccines, strain used,  |
|   |          | dose, route, schedule, risks,                                                |
| 5 |          | Development history                                                          |
|   | PE 1.5   | Define development and Discuss the normal developmental milestones           |
|   |          | with respect to motor, behavior, social, adaptive and language               |
| 6 |          | Nutritional history                                                          |
|   | PE 9.4   | Elicit, document and present an appropriate nutritional history and perform  |
|   |          | a dietary recall                                                             |
|   |          |                                                                              |
|   | PE 9.5   | Calculate the age appropriate calorie requirement in health and disease and  |
|   |          | Identify gaps                                                                |
| 7 |          | Socioeconomic history                                                        |
| 8 |          | <u>Anthropometry</u>                                                         |
|   | PE 1.4   | Perform Anthropometric measurements, document in growth charts and           |
|   |          | interpret                                                                    |
| 9 |          | General examination                                                          |
|   | PE 23.9  | Record pulse, blood pressure, temperature and respiratory rate and           |
|   |          | interpret as per the age                                                     |
|   |          |                                                                              |
|   | PE 29.11 | Identify external markers for hematological disorders e.g. Jaundice, Pallor, |
|   |          | Petechiae, Purpura, Ecchymosis, Lymphadenopathy, bone tenderness, loss       |
|   |          | of weight, Mucosal and large joint bleed.                                    |
|   |          |                                                                              |

| 10 |          | Systemic examination CVS/RS                                                                                                                                                                                                                                                          |
|----|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | PE 23.10 | Perform independently examination of the cardiovascular system – look for precordial bulge, pulsations in the precordium, JVP and its significance in children and infants, relevance of percussion in Pediatric examination, Auscultation and other system examination and document |
|    |          | Perform upper and lower respiratory system examination-                                                                                                                                                                                                                              |
|    |          | Physical examination of nose, throat ,neck and chest                                                                                                                                                                                                                                 |
|    |          | Look for tachypnoea, retractions. Relevance of percussion in Pediatric                                                                                                                                                                                                               |
|    |          | examination, Auscultation                                                                                                                                                                                                                                                            |
| 11 | PE 30.18 | Demonstrate the correct method for physical examination of CNS including                                                                                                                                                                                                             |
|    | PE 29.12 | identification of external markers. Document and present clinical finding                                                                                                                                                                                                            |
|    |          | Perform examination of the abdomen, demonstrate Organomegaly.                                                                                                                                                                                                                        |
|    | 1        | END OF POSTING EXAM                                                                                                                                                                                                                                                                  |

### Dept. of Community Medicine Clinical Posting Phase - II

| Sr.<br>No. | Name of the Topic                              |
|------------|------------------------------------------------|
| 1          | Introduction to UHTC and Environmental History |

| 2  | Family case I                                                                          |
|----|----------------------------------------------------------------------------------------|
| 3  | Family case II                                                                         |
| 4  | Antenatal care (Briefing)                                                              |
| 5  | Antenatal case                                                                         |
